Health Outcomes

HEDIS - Diabetes Management: HbA1c < 8%

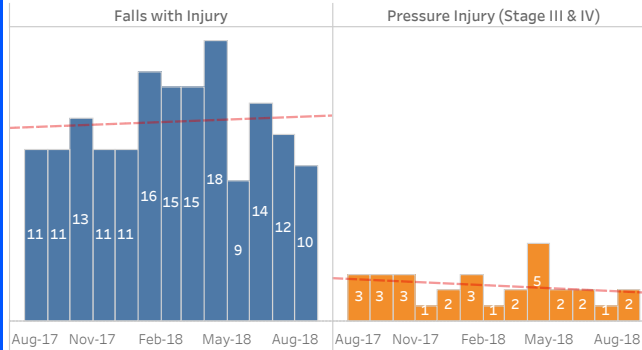

Core Measure-Venous Thromboembolism (VTE) Prevention

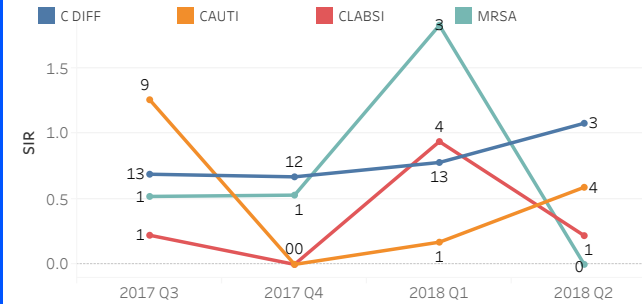

Patient Safety

Hospital Acquired Conditions

Hospital Acquired Infections

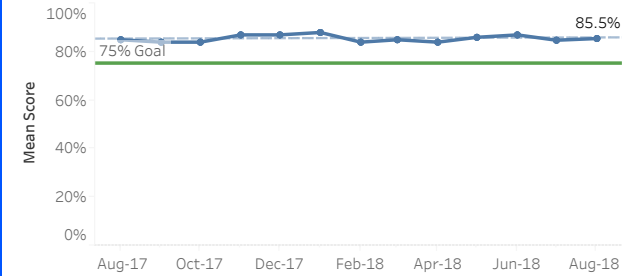

SIR (Standardized Infection Ratio) is a summary measure which compares the actual number of Healthcare Associated Infections (HAI) in a facility with the baseline data for standard population. SIR > 1.0 indicates more HAIs were observed than predicted, conversely SIR of < 1.0 indicates that fewer HAIs were observed than predicted.

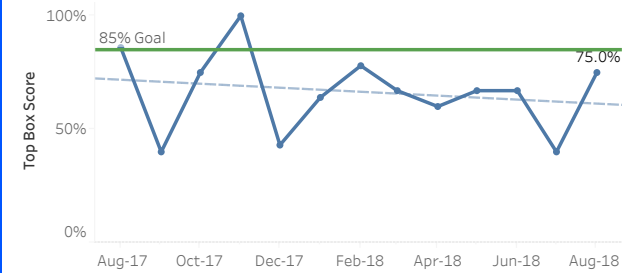

Readmission Rate Placeholder

Utilization

ACHN--Overall Clinic Assessment

Provident--Willingness to Recommend Hospital

Stroger--Willingness to Recommend Hospital
